Dear Hiring Manager,

I am thrilled to be applying for the Career Launch Program at RBC. I am a recent software engineer graduate from Toronto Metropolitan University (TMU), and I would love the opportunity to enhance my growth through exploring different roles and environments with RBC. I am certain I would be a great fit for this position due to my valuable leadership and collaboration skills.

My experience as a private mathematics tutor challenged me to provide guidance and supervision to my students. I personally developed notes, study guides, and practice problems to ensure my students were learning while enjoying math. There is nothing more frustrating than trying to complete a task where you are unsure what to do.

Additionally, by working with numerous colleagues in either pairs or groups, I progressed my skills in teamwork and communication. Throughout my undergraduate degree, I achieved exceptional grades and met project goals in every group project. For instance, I successfully developed desired software applications for both of the cross-functional teams I collaborated with, and successfully improved the performance of an existing AI by 39.5% over the course of 1000 iterations with my capstone team.

I am confident that the skills I have developed in my previous experiences allow me to grow, succeed, and make an impact in the RBC Career Launch Program. For more information about my skills and experience, visit my online portfolio. I single-handedly built my portfolio with my knowledge of design and programming! A URL link can be found above this cover letter or in my resume.

Thank you for your time and consideration, I look forward to hearing back from you.

Sincerely,  
Giordan Andrew Dela Cruz
